

What's in your water?

Date: August 29, 2017

Time: 8:30am– 4 pm

**Place: 900 Robert Street
Alexandria, MN 56308**

Once again the Douglas County Soil and Water Conservation District is hosting a Nitrate Clinic to determine what is in your water. **Please bring in a water sample to the office any time between 8:30 am and 4 pm** to have your water tested and annualized. There will be nitrate demonstration as well!

How to collect Samples: To take your sample, run your cold tap for five to ten minutes then collect about one cup of water in a plastic baggie (double bag) or clean jar. Keep the water cool until arrival. You can collect the water anytime within one day of the nitrate analysis (if you are going to the local office right after work, you can collect the sample in the morning and keep it cool all day until you arrive).

For more information please contact the Douglas County Soil and Water conservation District
